

DEPARTMENT OF PLANNING
STAFF REPORT

PLANNING COMMISSION PUBLIC HEARING

DATE OF HEARING: December 17, 2009

SPEX 2009-0006 – DULLES INDUSTRIAL PARK SOUTH, LOT 1

DECISION DEADLINE: January 11, 2010

ELECTION DISTRICT: Dulles

PROJECT PLANNER: Marchant Schneider

EXECUTIVE SUMMARY

Dulles South Properties, LLC of Rockville, Maryland, and AmeriGas, Inc. of Ranson, West Virginia, have submitted an application for a special exception to permit installation of two 30,000-gallon storage tanks for storage and distribution of propane gas in the MR-HI (Mineral Resource-Heavy Industry) zoning district. The area of the proposed special exception will comprise 0.97 acres of a 4.52 acre parcel located on the north side of Wade Drive, approximately 0.5 mile north of the intersection of Pleasant Valley Road and Route 50 in Chantilly. The proposed facility will be located with an existing air compressor rental company (Washington Air Compressor Company) and landscaping company (Palmer Landscaping) and is intended to replace an existing distribution facility in Aldie. Delivery and distribution trucks associated with the proposed special exception will be parked off-site at the AmeriGas offices in Ranson, West Virginia.

The area is governed by the policies of the Revised General Plan (Suburban Policy Area (Dulles Community)) as amended by the Arcola Area/Route 50 Corridor Plan, which designate this area for Industrial Uses. The application is subject to the Revised 1993 Zoning Ordinance and the proposed bulk propane storage is listed as a Special Exception use under Section 3-1004(Y). The property is also located within the AI (Airport Impact) Overlay District (Ldn 65 noise contour) associated with the Dulles International Airport.

RECOMMENDATIONS

Staff recommends approval of the special exception application. The proposed gas storage facility is consistent with the existing land use policies of the Revised General Plan for the subject area (Suburban Policy Area) and with the Revised 1993 Zoning Ordinance.

SUGGESTED MOTIONS

1. I move that the Planning Commission forward SPEX 2009-0006, Dulles Industrial Park South, Lot 1, to the Board of Supervisors with a recommendation of approval, subject to the Conditions of Approval dated December 4, 2009, and based on the Findings contained in the December 17, 2009, Planning Commission Public Hearing Staff Report.

OR,

2. I move that the Planning Commission forward SPEX 2009-0006, Dulles Industrial Park South, Lot 1, to a subsequent worksession for further discussion.

OR,

3. I move that the Planning Commission forward SPEX 2009-0006, Dulles Industrial Park South, Lot 1, to the Board of Supervisors with a recommendation of denial.

VICINITY MAP

Directions:

From Leesburg, take Route 15 south to Evergreen Mills Road (Route 621). Travel south on Evergreen Mills Road through Arcola to Loudoun County Parkway (Route 606). Take Loudoun County Parkway south to Route 50 east. Turn north on Pleasant Valley Drive then left onto Wade Drive. The subject property is located on the north side of Wade Drive at 44176 and 44180 Wade Drive.

II. REFERRAL AGENCY COMMENT SUMMARY

TOPIC / ISSUE AREA	ISSUES EXAMINED AND STATUS
Comprehensive Plan	<ul style="list-style-type: none"> ○ Consistency with land use policies of the <u>Revised General Plan</u> (RGP) (Suburban Policy Area, Dulles Community), as amended by the Arcola Area/Route 50 Corridor Plan, the <u>Revised Countywide Transportation Plan</u>, and the <u>Bicycle and Pedestrian Mobility Master Plan</u>. Status: No Issue. Storage and distribution of propane gas consistent with Industrial use designation. ○ Potential negative impacts to be avoided, minimized, or mitigated by appropriate conditions of approval. Provide information regarding federal, state, or other regulations pertaining to propane storage and distribution. Investigate fire safety and/or necessity for emergency action plan. Status: Conditions of Approval recommended (Conditions 3,4,5,6,7,8,9). Storage facilities subject to Section 58 of the National Fire Protection Association (NFPA) Liquefied Petroleum Gas Code. ○ Provide on-site water quality treatment. Status: Resolved. Plat revised to correctly size concrete pads used to support the storage tanks as well as identify replacement of existing graveled areas with vegetative ground cover. Additional stormwater management and/or best management practices for new development will be in accordance with the Facilities Standards Manual (FSM). ○ Provide perimeter landscaping to screen proposed uses from adjacent properties. Landscaped area to be maintained for the life of the project. Status: Condition of Approval recommended (Condition 8). 10% tree cover to be identified at site plan.
Environmental Review	<ul style="list-style-type: none"> ○ Provide information describing measures employed to ensure public and environmental safety. Status: Resolved. Storage tank design, emergency shut off-valves, employee training, and minimum distance requirements between tanks and buildings to ensure public safety. ○ Provide on-site water quality treatment. Status: Resolved. Plat revised to correctly size concrete pads used to support the storage tanks as well as identify replacement of gravel areas with vegetative ground cover. Additional stormwater management and/or best management practices for new development will be in accordance with the Facilities Standards Manual (FSM).
Zoning	<ul style="list-style-type: none"> ○ Notation, graphics, and zoning reference revisions to the Plat. Status: Resolved by Plat revision.

Section 3-1000: Mineral Resource – Heavy Industrial

III. FINDINGS

1. The proposed special exception for bulk storage of propane gas is consistent with the existing land use policies of the Revised General Plan (RGP) for the subject area (Suburban Policy Area – Industrial Use). Subject to the prescribed development conditions, the proposed special exception use will be in accordance the RGP.
2. The proposed special exception for bulk storage of propane gas is in accordance with the Revised 1993 Zoning Ordinance.
3. The special exception application provides improvements in support of the planned road network of the Revised Countywide Transportation Plan (2001).

IV. SPEX CONDITIONS OF APPROVAL (December 4, 2009)

Staff recommends the following Conditions of Approval in accordance with the applicable land use policies of the Revised General Plan. The language of the conditions continues to be discussed with the Applicant. Staff will provide a status report to the Planning Commission public hearing identifying what revisions, if any, have been made in consultation with the Applicant and County staff.

1. **Substantial Conformance.** The proposed bulk storage of propane gas shall be developed in substantial conformance with Sheet 2 and Sheet 3 (together comprising and herein referred to as the “Special Exception Plat”) of the plan set entitled Special Exception Plat, Lot 1, Dulles Industrial Park South, SPEX 2009-0006, prepared by William H. Gordon Associates, dated February 2009, revised through November 16, 2009 (the “Plans”) and the Revised 1993 Loudoun County Zoning Ordinance (the “Zoning Ordinance”). Approval of this application for Tax Map /102///1/////1/ (PIN# 097-40-7676) (the “Property”), shall not relieve the Property from the obligation to comply with and conform to any other Zoning Ordinance, Codified Ordinance, or applicable regulatory requirement.
2. **Uses Permitted.** Approval of the Special Exception grants approval for the storage of bulk gasoline, petroleum products and natural gas, small and large, as defined by the Revised 1993 Loudoun County Zoning Ordinance, in the MR-HI (Mineral Resource – Heavy Industrial) Zoning District. Storage of distribution vehicles shall not be permitted on the Property.
3. **Hours of Operation.** Use of the propane tanks and associated equipment shall be limited to 7:30am to 5:00pm, Monday through Friday, except as required for maintenance and safety inspection.
4. **Storage Tank Design.** The applicant shall utilize precast, reinforced concrete steel piers to support the propane tanks. The propane tanks shall be painted light, reflective colors.

5. **Emergency Response and Evacuation Plan.** Prior to the issuance of the first zoning permit for the permitted use, the applicant will develop and submit an Emergency Response and Evacuation Plan to the Department of Fire, Rescue and Emergency Management for Fire-Rescue preparedness training specific to the propane tanks and associated equipment that are to be installed on the Property.
6. **Safety Equipment.** The applicant shall install a remote emergency gas shut-off station within two hundred and fifty-five feet (255') of the propane tanks. Stored propane shall contain an odorant for gas leak detection.
7. **Fencing.** Prior to or in conjunction with site plan approval for the Property, the Applicant shall install a chainlink fence at least six feet (6') in height along the perimeter of the propane tanks as shown on Special Exception Plat Sheet 3.
8. **Landscaping.** The applicant shall install a Type 2 buffer with supplemental evergreen plantings within the Evergreen Tree Buffer / Screen as shown on the Special Exception Plat Sheet 3 prior to or in conjunction with the first zoning permit approval for the permitted use. The applicant shall utilize native species for new plant material, as determined in consultation with the County Urban Forester, to the maximum extent possible. Landscaping materials within the Evergreen Tree Buffer / Screen shall be maintained in good condition by the property owner or appropriate owners association for the life of the planted material.
9. **Lighting.** No lighting fixtures shall be installed in conjunction with the permitted use unless otherwise required by law, ordinance, or regulation.
10. **Right of Way.** Upon written request by the Virginia Department of Transportation (VDOT) or the County, the Applicant shall dedicate five feet (5') of right of way along the Property's frontage to Wade Drive (Route 872) for construction of the planned Route 50 North Collector Road. Such provision shall be made at no cost to VDOT or the County.
11. **Easements.** Upon written request by VDOT or the County, the applicant shall grant construction, drainage, and all other easements necessary for the construction of the Route 50 North Collector Road described in Condition 4 above, at no cost to VDOT or the County.
12. **Pump and Haul Facilities.** Pump and haul tanks located on the Property shall be abandoned prior to or in conjunction with first site plan approval for the permitted use.

Location

The two proposed 30,000 gallon tanks will be located on 0.97 acre portion of a 4.52 acre property located within the Dulles Industrial Park in Chantilly. The subject property is generally bound by a variety of heavy, light, and flex industrial uses including several landscaping and composting companies, a recycling and processing waste facility, a concrete plant, a crane service company, an irrigation supply, and construction equipment and vehicle/truck storage companies. The subject site is located within the Ldn 65 airport noise contour associated with the Washington Dulles International Airport.

Transportation

The subject parcel is accessed via multiple entrances from Wade Drive. The Applicant estimates up to 94 trips to and from the site monthly. The 2001 Revised Countywide Transportation Plan (CTP) identifies Wade Drive as a portion of the planned Route 50 North Collector Road.

Site Conditions

The majority of the site has been previously cleared and graded for an office/heavy equipment repair building and associated storage sheds and parking on the site. The property is served by a private on-site sewer system and on-site well; however, recent extensions of public water and sewer along Wade Drive will require abandonment of the site system. Vegetation on the site is minimal.

Figure 2. Site Entrance – View from Wade Drive

B. SUMMARY OF OUTSTANDING ISSUES

The language of the Conditions of Approval continues to be discussed with the Applicant. Staff will provide a status report to the Planning Commission public hearing identifying what revisions, if any, have been made in consultation with the applicant and County staff.

C. OVERALL ANALYSIS

REVISED GENERAL PLAN (RGP)

Land Use

The site is located in the Dulles Community of the Suburban Policy Area and is designated for Industrial uses. Revised General Plan (RGP) policies direct that areas planned for Industrial uses accommodate the continued operation and expansion of major industrial uses in the County while providing a degree of protection from incompatible, non-industrial land uses. Primary land uses within planned industrial areas are General Industry and Heavy Industry. The proposed bulk storage and distribution of propane gas will be co-located with existing industrial uses on the subject property. As noted above, a variety of industrial uses have developed adjacent to the site consistent with the planned land use designation. The subject property's location within the Ldn 65 airport noise contour associated with the Washington Dulles International Airport precludes encroachment of non-compatible, residential development. As such, the proposed use appears to be in conformance with the RGP's vision for Industrial areas and is generally compatible with established industrial uses.

Site Design / Stormwater Management

The RGP envisions that general industrial areas will be designed complement surrounding land uses by means of appropriate arrangement of buildings and service areas, attractive architecture, and effective landscape buffering. Specifically, landscape buffers will be utilized to break up monotonous parking surfaces, structural walls, and storage areas and enhance the aesthetic quality of General Industrial areas. The RGP also states that major water resource issues for the County include protecting groundwater and surface water (i.e., streams and wetlands) from contamination and pollution as well as preventing the degradation of water quality in watersheds. The subject property is located in the Bull Run watershed and drains to the Occoquan Reservoir, a drinking water supply. The site is also upstream of the Cub Run Stream Conservation Unit.

The proposed propane tanks will be located at the rear of the property, fifty feet from the property line and surrounded by a six foot chainlink fence. A gravel driveway will provide vehicle access to the tanks and existing gravel areas will be replaced with vegetative groundcover (grass). Delivery vehicles will be stored off-site. An evergreen buffer buffer/screen is proposed along the southern boundary of the fenced area facing

Wade Drive. Additional tree canopy requirements (10% of the entire property) will be reviewed at the time of site plan. Facilities Standards Manual (FSM) requirements for Stormwater management and /or best management practices for new development will be determined at site plan. As noted above, the site has been cleared of vegetation. The proposed screening and reclaimed ground cover will improve the aesthetic quality of the existing facilities as well as provide groundwater recharge and treatment consistent with RGP policies.

TRANSPORTATION

The subject parcel is accessed via multiple entrances from Wade Drive. The Applicant estimates between 6 and 94 trips monthly by delivery and distribution trucks. The 2001 Revised Countywide Transportation Plan (CTP) identifies Wade Drive as a portion of the Route 50 North Collector Road. The Route 50 North Collector Road is a planned, local access, four-lane undivided urban collector road within a 70 foot of right-of-way.

Office of Transportation Services (OTS) Staff requested the applicant provide right-of-way necessary for 35 feet of right-of-way from the centerline of the planned North Collector Road to the property line. The Applicant has agreed to provide an additional 5 feet of right-of-way necessary to meet the 35 foot requirement as well as required construction easements in support of the future planned roadway. OTS staff also requested the applicant identify internal traffic movements for the proposed use as well as verify the multiple entrances to the site will meet VDOT requirements. Traffic movement is shown on the Special Exception Plat and the three entrances to the site have been accepted by VDOT.

FIRE AND RESCUE

The Dulles South Public Safety Center (Station 19) is identified as the first responder to the subject property. Public water was recently extended along Wade Drive with two fire hydrants installed along Wade Drive adjacent to the site.

Community Planning, Environmental Review, and Fire-Rescue staff requested additional information regarding safety measures associated with the proposed propane tanks. In response, the Applicant states the storage and distribution of propane gas is subject to Section 58 of the National Firefighters Protection Association (NFPA) Liquefied Petroleum Gas Code. Among other requirements, Section 58 requires automatic shutdown valves and remote shutdown capabilities. Specific to the proposed use, 30,000 gallon propane tanks are to be spaced minimum 5 feet from each other and 50 feet from buildings.

A 6-foot high security fence is to be installed around the propane tanks and associated equipment. The propane storage tanks will be supported by precast reinforced concrete piers and are to be painted with light, reflective colors. The tanks are constructed with 1¼" thick steel walls with a pressure release valve 12 inches above the top of the tanks. Upgraded pneumatic actuator valves will automatically shut off the flow of gas if any

leak is detected and will immediately notify AmeriGas of the leak. Propane stored on the premises will contain an odorant so that any potential leak could be promptly detected and shut off at a remote emergency shut-off station constructed between 100 and 255 feet from the tanks. Gas within the tanks is stored at negative -40° F. In the event that the ignition point of the gas is reached, resulting flames would be released through the described pressure valve, negating the explosion of the tanks. Lastly, the tanks will be surrounded by appropriate safety signage and will be subject to inspection by the Fire Marshall prior to the storage and distribution of propane gas.

The Applicant states AmeriGas employees and drivers receive mandatory safety training. Submission of an emergency response and evacuation plan will be provided to the Department of Fire, Rescue, and Emergency Management prior to first zoning permit for the construction of the storage area. The Applicant has also offered to provide Fire-Rescue personnel assistance with safety training and preparedness planning for the facility once it is in operation.

Per the adopted Board Fire and Rescue Policy, all applicants are requested to provide a one-time contribution of \$0.10 per gross square foot to be distributed to the primary volunteer fire and rescue agencies, escalated annually from the base year when the policy was adopted (1988). County practice has been to apply the policy to the square footage of structures proposed with the Special Exception use. Escalated to 2009 (\$0.18), the requested contribution, based on the dimensions of the Special Exception Area (42,253 square feet), is approximately \$7,605. A fire-rescue contribution has not been volunteered by the Applicant consistent with the Board Policy.

D. ZONING ORDINANCE CRITERIA FOR APPROVAL

Section 6-1310 of the Revised 1993 Loudoun County Zoning Ordinance states "In considering a special exception application, the following factors shall be given reasonable consideration. The Applicant shall address all the following in its statement of justification or special exception plat unless not applicable, in addition to any other standards imposed by this Ordinance":

Standard (A) *Whether the proposed special exception is consistent with the Comprehensive Plan.*

Analysis As outlined and discussed above in Section C, Overall Analysis, Revised General Plan (RGP) policies designate the subject site for Industrial uses. The use of the subject site storage of bulk propane storage is generally in conformance the RGP's vision for Industrial areas and is compatible with established uses on similarly planned properties adjacent to the site. Subject to development conditions described above, the proposed special exception will be in accordance with the RGP.

- Standard (B) *Whether the proposed special exception will adequately provide for safety from fire hazards and have effective measures of fire control.*
- Analysis As described above in Section C, Overall Analysis, Fire-Rescue, the proposed special exception use will provide effective safety and fire control measures that will meet national, state, and local fire safety requirements and regulations.
- Standard (C) *Whether the level and impact of any noise emanating from the site, including that generated by the proposed use, negatively impacts the uses in the immediate area.*
- Analysis The proposed special exception use is not anticipated to generate noise which will negatively impact similarly planned properties in the immediate area (Industrial).
- Standard (D) *Whether the glare or light that may be generated by the proposed use negatively impacts uses in the immediate area.*
- Analysis A condition of approval prohibits lighting for the use unless otherwise required by law, ordinance, or regulation.
- Standard (E) *Whether the proposed use is compatible with other existing or proposed uses in the neighborhood, and adjacent parcels.*
- Analysis The RGP designates the Dulles Industrial Park and surrounding area for Industrial use. The subject property and adjoining properties are similarly zoned MR-HI consistent with the planned land use designation. The proposed use is compatible with established industrial uses on the property (air compressor rental and landscaping services) and adjacent parcels (landscaping and building materials supply, equipment rental and maintenance, concrete production, etc.).
- Standard (F) *Whether sufficient existing or proposed landscaping, screening and buffering on the site and in the neighborhood to adequately screen surrounding uses.*
- Analysis The storage tanks and associated equipment will be located within a fenced area located 50 feet from the property line. An evergreen buffer will screen the fence, tanks, and equipment from Wade Drive. Additional tree canopy will be required at site plan.
- Standard (G) *Whether the proposed special exception will result in the preservation of any topographic or physical, natural, scenic, archaeological or historic feature of significant importance.*

Analysis No topographic or physical, natural, scenic, archeological, or historic features of significant importance has been identified on the subject property as stated in study waivers submitted by the Applicant.

Standard (H) *Whether the proposed special exception will damage existing animal habitat, vegetation, water quality (including groundwater) or air quality.*

Analysis The site has been extensively cleared and graded. The Applicant proposes to remove compacted gravel and replace it with vegetative groundcover (grass). New landscaping will be installed along the southern boundary of the fenced area. Impervious surfaces will be limited to a small concrete pad and concrete pier supports for the tanks. No Endangered and Threatened Species (ETS), rare plant species, or rare plant communities were observed on the Property but have been identified in proximity to the site (Cub Run Conservation Unit). The noted improvements will improve groundwater recharge and stormwater treatment on the site.

Standard (I) *Whether the proposed special exception at the specified location will contribute to or promote the welfare or convenience of the public.*

Analysis Industrial uses and activities associated with industrial uses such as bulk gas storage and distribution makes them incompatible with residential development and similar noise-sensitive uses. RGP policies state such development is best located within planned Industrial areas. The proposed special exception use is consistent with these policies, therefore promoting the welfare of the public. The location of the storage area will also allow for convenient and affordable access to propane gas by residential and commercial users.

Standard (J) *Whether the traffic expected to be generated by the proposed use will be adequately and safely served by roads, pedestrian connections and other transportation services.*

Analysis OTS Staff has determined the anticipated traffic impact of the proposed use is negligible and that the local road network has adequate capacity to safely serve the site.

Standard (L) *Whether the proposed special exception will be served adequately by essential public facilities and services.*

<u>Analysis</u>		As identified in the attached referral agency comments, the proposed special exception use will be adequately served by existing public facilities and services.
<u>Standard</u>	(M)	<i>The effect of the proposed special exception on groundwater supply.</i>
<u>Analysis</u>		The proposed special exception use is not anticipated to have an adverse affect on the County's ground water supply. Public water and sanitary sewer service will be provided by Loudoun Water (formerly LCSA). Removal of compacted gravel and installation of evergreen landscaping will help improve groundwater quality and recharge.
<u>Standard</u>	(N)	<i>Whether the proposed use will affect the structural capacity of the soils.</i>
<u>Analysis</u>		The proposed storage area is not anticipated to affect the structural capacity of the soils. Compliance with the requirements of the County's Facilities Standards Manual will ensure adequate structural capacity for the proposed use.
<u>Standard</u>	(O)	<i>Whether the proposed use will negatively impact orderly and safe road development and transportation.</i>
<u>Analysis</u>		See the staff analysis of Standard (J) above. The Applicant has agreed to dedicate right-of-way and construction easements in support of the planned Route 50 North Collector Road.
<u>Standard</u>	(P)	<i>Whether the proposed special exception use will provide desirable employment and enlarge the tax base by encouraging economic development activities consistent with the Comprehensive Plan.</i>
<u>Analysis</u>		The proposed special exception use will facilitate desirable employment in support of the planned land use designation of the area (Industrial), thereby enlarging the County's tax base.
<u>Standard</u>	(Q)	<i>Whether the proposed special exception considers the needs of agriculture, industry, and businesses in future growth.</i>
<u>Analysis</u>		The proposed special exception use is intended to support existing and future fuel needs of agriculture, industry and businesses within Loudoun County.
<u>Standard</u>	(R)	<i>Whether adequate on and off-site infrastructure is available.</i>

SPEX 2009-0006 – DULLES INDUSTRIAL PARK SOUTH, LOT 1
PLANNING COMMISSION PUBLIC HEARING
December 17, 2009

Analysis Adequate on and off-site infrastructure will be provided prior to development of the proposed storage area. Public water and sewer have been recently extended along Wade Drive.

Standard (S) *Any anticipated odors which may be generated by the uses on site, and which may negatively impact adjacent uses.*

Analysis The proposed special exception use is not anticipated to generate odors which will negatively impact similarly planned properties in the immediate area (Industrial). Propane odorant associated with gas leak detection will dissipate following manual or automatic gas valve shut-off.

Standard (T) *Whether the proposed special exception uses sufficient measure to mitigate the impact of construction traffic on existing neighborhoods and school areas.*

Analysis Existing and proposed road networks serving the proposed special exception use have adequate capacity divert construction traffic away from existing neighborhoods and school areas.
